

## POLYCYTHEMIA VERA SYMPTOM ASSESSMENT FORM

A tool for tracking your polycythemia vera (PV) symptoms

## **Know your PV symptoms**

**There are 3 important words** you need to know to identify your symptoms:

**SYMPTOM:** Which symptom are you experiencing?

**SEVERITY:** How severe is the symptom?

IMPACT on quality of life: How is it affecting your daily life?

Sharing this information with your healthcare professional will

give them a better understanding of how your PV is making you

feel and how to help you manage symptoms.

Watch a video and take a real-time assessment of your PV symptoms with a leading MPN expert.

Cytokine symptoms				MPN expert.  Dr John Mascarenhas

## **Glossary**

**CYTOKINE:** A type of protein in the body that has an effect on the body's immune system. When your body has too many of these proteins, you may experience various symptoms related to PV. **HYPERVISCOSITY:** A condition where the overproduction of red blood cells in the body causes the blood to thicken, making it harder to flow through smaller blood vessels.
